Experience

Cricut

Devops Engineer / April 2018 - Present

- Migrated all infrastructure from on premise to AWS using AWS CloudFormation
- Created and Implemented several libraries to facilitate service discovery used in all AWS Lambdas and .Net Core micro services
- Developed several new releases for .Net Core and Node micro services
- Obtained GitHub ownership and became a vital reviewer on all pull requests across the company
- In charge of all builds companywide, created and maintained a library written in PowerShell that is used in every build

Upwell

Software Engineer / April 2017 – March 2018

- Migrated all applications from basic servers hosted on PCF into Docker containers and hosted on AWS ECS to reduce company costs and increase performance
- Built applications to support business operations, marketing, and compliance departments
- Analyzed, maintained and updated vital legacy code

Certifications

Advanced Developing on AWS / October 2019
